

Porous Metal Breather-Vent-Filters

Male – 10-32 - 2"

Female – 1/8" - 1/2"

Special Applications

Tough, inexpensive and low-profile

- Suitable alternative for spaces too small to accommodate standard Porous Metal Filter-Mufflers
- Compact unit in standard 90 Micron porous bronze is most often used as a breather-vent-filter for cylinders, gear boxes, crank cases, storage cases, storage tanks, and other vessels where pressure equalization is required
- Modifications are available using highly porous screen media to allow for unrestricted flow while limiting infiltration of unwanted objects
- Recommended for pressures up to 125 psi (8.6 Bar)

Male 90 Micron - Porous Bronze Disc
