## WORKING WITH BIMBA GIVES YOU:

- The Original stainless steel body cylinder company — with more sizes and options than any other manufacturer.
- Fast service — many models and sizes kept in stock for immediate delivery.

Rod threads roll-formed for high strength

Low friction Buna N "U" cup rod seal (optional)  
High or Low temperature options)

High strength aluminum alloy porting ends

Low friction Buna N "U" cup piston seals (optional High Temperature option or Low temperature seals)

High-strength aluminum alloy piston with blow-by flats

## OUR ORIGINAL LINE CYLINDER FEATURES AND ADVANTAGES INCLUDE:

- 304 stainless steel body with mirror finish ID For long, reliable life.
- Pre-lubricated with semi-synthetic grease, no additional lubrication is required.
- Piston-to-rod connection is threaded, sealed and riveted securely in place.
- Low breakaway frictional characteristics: collapsible U-cup rod and piston seals; oil-impregnated, sintered bronze rod bushing on most sizes; and breakaway slots on each endcap for fast seal inflation.

- Worldwide availability through local stocking distributors
- Custom-design capabilities for your specific needs.

Piston rod — high strength carbon or Type 303 stainless steel (see page 1.5 for more info)

Oil-impregnated rod guide bushing (except 5/16", 7/16" and 9/16" single acting)

Double rolled-in construction

Type 304 stainless steel body

Piston rod threaded, sealed and riveted

- Roll-formed rod threads on both ends for high strength

- Blow-by flats on double acting model pistons ensures proper seal inflation.

- 250 psi rating.

- High strength aluminum alloy porting ends, machined for minimal breakaway during initial pressurization.

## How to Order

The model number of all Original Line cylinders consists of three alphanumeric clusters. These designate product type, bore size and stroke length, and mounting styles and options.

Please refer to the charts below for an example of model number BR-013-DBEE0.5. This is a rear block, 7/16" bore, 3" stroke double acting cylinder with bumpers and an extra extension of 1/2".

### Approximate Power Factors

5/16"	0.07
7/16"	0.15
9/16"	0.25
3/4"	0.4
7/8"	0.6
1-1/16"	0.9
1-1/4"	1.2
1-1/2"	1.7
1-3/4"	2.4
2"	3.1
2-1/2"	5.0
3"	7.0

$$FORCE = \frac{Airline\ Pressure}{Piston\ Area} \times \text{Piston Area}$$

$$PISTON\ AREA = \frac{Bimba\ Power\ Factor}{FORCE}$$

$$FORCE = \frac{Airline\ Pressure}{Piston\ Area} \times Bimba\ Power\ Factor$$

Bimba has made sizing a cylinder as easy as knowing the model number. Each base model number is developed by calculating the area of the cylinder bore. This area, or Power Factor, will provide the force the cylinder will exert when multiplied by the airline pressure.

## Options

Many options can be added to our standard cylinders. Options vary by bore size. See individual bore sizes for valid options, pricing and length adders for that size. Consult specific cylinder types in this catalog for options available for those cylinder types.

### Option Combination Availability Chart

Due to design or compatibility restrictions, the following options may **NOT** be ordered in combination. For example, option K (ports rotated) and option Q (side ported rear head) are not a valid combination.

Options NT and EE are available independently, with each other or with all other options or viable option combinations.

#### Notes:

- Option M is designated as a prefix, (ie M-041-DXP). When M is specified, the piston rod will be made of 303 stainless steel. Certain bore sizes and mounting styles offer the stainless rod standard.
- When bumpers are standard and high or low temperature option is specified, the bumpers are omitted and the overall length of the cylinder may decrease. When bumpers and high temperature are ordered as options on the same cylinder, the bumper material will be standard Buna N.
- Wipers are available in double acting and reverse single acting models only. Wipers may not be available with certain mounting configurations. Consult the specific bore size in this catalog for detail.
- When high temperature and the magnetic options are combined, operating temperature remains at 200°F. This combination is recommended when Fluoroelastomer seals are specified for compatibility. When specifying the high temperature and wiper options together, a standard Buna N or Urethane wiper will be provided.
- Option HL applies only to Double Acting Original Line cylinders and is not available with the following series: Cushion, PC, MRS, NR, Z-Line, DNR, 500 Hydraulic and Multiple Position.

## Accessories

---

Accessories have separate catalog numbers and are shown at the end of each bore size section. Most accessories are zinc-plated carbon steel. We also offer stainless steel accessories in some bore sizes.

## Lubrication

---

Standard Original Line Cylinders are pre-lubricated at our factory with a semi-synthetic grease and do not require additional lubrication during their service life. In some instances where a specified option is not conducive to our standard grease pre-lubrication, such as our High Temperature and Hydraulic options, alternate standard pre-lubrications will be applied. See below for complete details. Additional optional pre-lubrications are available upon customer request.

- Optional oil pre-lubrication is available in most models and can be ordered by specifying option "99".
- Cylinders ordered with our High Temperature seals are pre-lubricated with an oil more suitable for high temperature applications.
- Cylinders ordered with our Low Temperature seals are pre-lubricated with a grease more suitable for low temperature applications.
- All Hydraulic Cylinders are lubricated with our proprietary oil lubrication (HT-99).
- All Stainless Steel cylinders are pre-lubricated with food grade grease.

HT-99 and Magnalube G can be ordered through your local Bimba distributor.

HT-99-7CC	\$4.75/bag (6) 7 cc tubes per bag
MAG-G-3CC	\$7.65/bag (2) 0.3 oz. tubes per bag

## Piston Rod Material

---

Standard models feature ground and polished, high strength carbon steel piston rod or ground and roller burnished type 303 stainless steel. Stainless steel can also be ordered as an option on most models (see models for pricing). Stainless steel is standard on the following models:

- All 5/16", 7/16" and 9/16" bore cylinders
- All cylinders with adjustable cushions
- All 9/16" through 3" bore cylinders ordered with Magnet (M) option
- MRS cylinders
- "Z" Line cylinders
- Block and Trunnion-mounted cylinders
- Universal mount, double-end rod cylinders
- All Fail Safe models (options JS/JR)

Hard chrome plated rod is standard on "500" Hydraulic cylinders.

## Temperature Range

---

Buna N seals with a temperature range of -20° F (-29° C) to 200° F (90° C) are standard in all BIMBA air cylinders. Fluoroelastomer seals rated for higher temperature applications (up to 400° F) are available. When specifying our magnetic piston ("M" option), maximum operating temperature is 200° F based on the material of the magnet. If cylinders are operated at temperatures below 0° F for extended time periods, our low temperature seal and lubrication option (N) is recommended. This option has a temperature range of -40° F to 200° F. If cylinders are operated below -20° F with low temperature seals for extended time periods, cylinder performance will be affected by the cold temperature.

## **Mounting**

---

Mounting should be by the threaded stud ends, pivot or bolt holes provided. Mount cylinders to provide alignment with the driven mechanism, avoiding side loads that restrict the free operation of the cylinder.

## **Free Test Cylinder**

---

Since 1975, our policy has been to provide a FREE TEST CYLINDER to any qualified original equipment manufacturer. This service is provided at no obligation, but we would appreciate a copy of your test results. Contact us or your local stocking BIMBA distributor for more information.

## **Special Cylinders**

---

Do you have a complicated or unusual application? BIMBA will custom-design and build the cylinder that will solve your problem. Whatever your needs—special stroke, mounting styles, rod-end configurations, seal materials, dimensional changes, etc.—contact us or your local stocking BIMBA distributor.

## **Delivery/Availability**

---

Bimba cylinders are sold through local stocking distributors. Each distributor maintains an inventory of our most popular models. At the factory, Bimba classifies cylinders as shelving and nonshelving models. More than 125,000 units of various shelving models are kept in stock for immediate delivery. Standard stroke lengths shown in blue are stocked at Bimba. (Most stocked models shown in blue do not include options.) These stroke lengths are available in limited quantities for immediate shipment. Bimba also stocks a large quantity of cylinders with options such as stainless steel rods or bumpers. Nonstocked standard models are manufactured within 5 working days.

## **Cylinder Life Expectancy**

---

Bimba cylinders have been designed and tested for an expected life of 3,000 miles of travel when properly applied. Additional lubrication is not required. This life estimate applies to cylinders with our standard semi-synthetic grease pre lubricant, and may not include cylinders with design modifications, those exposed to harsh operating conditions or any unintended applications. Please note that for cylinders utilizing Fluoroelastomer seals, the life rating will be 1,400 miles of travel when properly applied.

# **Bimba Original Line - Stainless Steel Body Air Cylinders**

## **Types of Cylinders**

Bimba manufactures several different types of Original Line cylinders for your applications. These include the basic 5/16" to 3" bore cylinders described on pages 1.10-1.64. Weights published for each cylinder are approximate. Additional styles include:

### **Three-Position Cylinders**

This multi-position Original Line stainless body cylinder provides three positive stroke positions with a single cylinder.

### **Cushion Cylinders**

These include adjustable air cushions that slow cylinder speed at the end of stroke, reducing impact and extending cylinder life. Cushions can be ordered on rear, front or both ends, and can be ordered in combination with magnetic pistons.

### **MRS Cylinders**

These include a magnet on the piston, designed to operate Bimba switches to actuate programmable controllers, relays, solenoids, timers or other electrically operated equipment. Dimensional differences from the basic Original Line include larger mounting threads and longer overall lengths in certain bore sizes.

### **Non-Rotating Cylinders**

Double acting and reverse acting non-rotating cylinders have a unique square piston rod with rounded corners. They are dimensionally interchangeable with the standard Original Line.

### **PC Cylinders**

These cylinders include acetal resin end caps. They are ideal for applications and environments that require exposure to moisture, lubricants and specific solvents. All dimensions except 1½" bore nose threads are interchangeable with the Original Line.

### **All Stainless Steel Non-Repairable Cylinders**

The new all stainless Original Line cylinders are the perfect solution for applications in the food processing/ packaging, medical, chemical, or marine environments where wash down solutions or other corrosives are present in the environment. Designed to be dimensionally interchangeable with our standard Original Line, these cylinders offer a cost effective method of extending cylinder life in difficult application environments.

### **All Stainless Steel Repairable Cylinders**

The new all stainless repairable Original Line cylinders are ideal for food processing, chemical, medical, pharmaceutical, offshore or marine equipment, and energy production or waste management applications. The bell ring design also offers the added benefit of full reparability without the need for hand tools by securing the body to the rod guide with a knurled, threaded nut.

### **Z-line Cylinders**

For extremely tough applications, with larger diameter, two-piece piston rod, elastomer bumpers and Buna N U-cup seals for low breakaway.

### **Rod Lock Cylinders**

This cylinder is a normally clamped unit that holds the piston rod in position when air pressure is not present. It is ideal for preventing drift at machine shut down.

### **500 Hydraulic Cylinders**

For hydraulic use, up to 500 psi.

### **Low Pressure Hydraulic Cylinders**

Designed for use in low pressure hydraulic circuits with pressures not exceeding 250 psi. The design incorporates chrome plated piston rods and hydraulic seals.

### **Hole Punchers**

These are designed to punch millions of holes in thin film or plastic materials 2 to 3 mils thick.

## Stroke Lengths

Standard stroke lengths and recommended maximum stroke lengths are listed in each model description. Special stroke lengths are available upon request. Stroke lengths are available in lengths longer than published, but an application review may be required. The cost per inch of stroke is listed below the base price of each cylinder. On models with 1/2" standard stroke length increments, add 1/2 of the per inch price for the 1/2" inch of stroke.

**NOTE ON ROD MATERIAL:** Please refer to table to determine the maximum stroke lengths for cylinders with carbon steel rods. Stroke lengths greater than those shown require a stainless steel rod.

Maximum Stroke Without SR- Option		
Bore Size	Double Acting	Single Acting
3/4" (04)	12"	11"
7/8" (06)	12"	11"
1-1/16" (09)	12"	11"
1-1/4" (12)	12"	9"
1-1/2" (17)	12"	10"
1-3/4" (24)	12"	8"
2" (31)	6"	4"
2-1/2" (50)	6"	--
3" (70)	6"	--

## Fractional Stroke Lengths

Fractional stroke lengths for single and reverse acting cylinders, both standard and nonstandard, require special calculations to determine cylinder dimensions. The following equations apply:

### Single Acting Cylinders

Calculate the length of next whole standard increment of stroke, then subtract the difference between desired stroke and next longer whole increment of stroke.

*Example: 092.75*

$$\begin{array}{rcl} 090 \text{ Base length} & = & 1.94" \\ \text{Plus } 1.56 \text{ per inch of stroke} & = & +4.68" \\ 1.56 \times 3.0 \text{ (next longer} & & \\ \text{stroke increment)} & & \\ 093 \text{ length} & = & 6.62 \\ \text{Whole stroke increment} & = & 3.00" \\ \text{Minus desired stroke} & = & -2.75 \\ \text{Stroke difference} & = & .25 \dots -0.25 \\ 092.75 \text{ length} & = & 6.37" \end{array}$$

### Reverse Acting Cylinders

Calculate length of next longer standard increment of stroke, then subtract twice the difference between desired stroke and next longer standard increment of stroke.

*Example: 011.625-RP*

$$\begin{array}{rcl} 010\text{-RP Base length} & = & 2.38" \\ \text{Plus } 1.44 \text{ per each } 0.5" \text{ of stroke} & = & +5.76" \\ 1.44 \times 4 \text{ (number of standard} & & \\ \text{increments required for the} & & \\ \text{next longer increment)} & & \\ 012\text{-RP length} & = & 8.14 \\ \text{Standard stroke increment} & = & 2.000" \\ \text{Minus desired stroke} & = & -1.625 \\ \text{Stroke difference} & = & .375 \\ \text{Twice stroke difference} & = & .750 \dots -0.75 \\ 011.625 \text{ length} & = & 7.39" \end{array}$$

### Double Acting Cylinders

Add desired stroke length to base length of cylinder.

*Example: 041.25-D*

$$\begin{array}{rcl} 040\text{-D Base length} & = & 2.97" \\ \text{Plus } 1.25 \text{ stroke} & = & +1.25" \\ 041.25\text{-D length} & = & 4.22 \end{array}$$

**NOTE:** Additional charges may be added for small quantity orders of fractional, nonstandard stroke lengths. Consult your local stocking BIMBA distributor.

## Pressure Rating

Original Line, Cushioned Original Line, NR series, Z-line, MRS and hole punchers = 250 psi.  
PC cylinder = 100 psi.  
Bimba 500 Hydraulic = 500 psi hydraulic.  
Reservoirs = 250 psi.

## Switch Track Kit Options

**For Original Line cylinders, including MRS cylinders, with -T2, T3, and T4 options**

## Switch Track for use with Bimba MR, MS, MSC, and MSK Switches

Miniature Position Sensing track lengths can now be purchased separately for field mounting of custom track locations. Simply specify the length of track desired after the part number.

### Mounting recommendations:

- Clean body with acetone. Remove all oil from body surface.
- Avoid mounting track over rolled construction. Locate edge of track 0.175" from rolled construction.
- Use a solid continuous bead of glue for the entire length of track used. Bead should fill center channel of track.
- Adhere to recommended cure times as specified by the glue manufacturer.

Bores	Part Number	List Price	Adder per Inch
007 - 04	D-74168-A-length	\$3.59	\$1.25
06 - 31	D-78527-A-length	3.59	1.25
50 - 70	D-78528-A-length	3.59	1.25

Loctite U-05FL or similar adhesive is recommended (not included).

# 7/16" Bore Air Cylinders

- Ground and Roller Burnished 303 Stainless Steel Piston Rod Standard
- Force Exerted Approximately 0.15 of Air Line Pressure
- Enclosed Spring Force: 1 lb. Relaxed — 2 lbs. Compressed

## OPTIONS:

### NO CHARGE:

- **PORTS ROTATED (K)** (Not available in block mount)
- **NO THREAD (NT)**
- **SIDE PORTED REAR HEAD (Q)**  
Add .19" to nose mount overall length
- **PIVOT BUSHING (Y)**  
.157" ID (Use bracket D-12321-A)

### SINGLE AND REVERSE ACTING BUMPER (B)

- \$3.59 additional
- Add .062 to overall length; Reverse acting, add .125

### DOUBLE ACTING BUMPER (B)

- \$4.99 additional
- Add .188 to overall length – DXDE; add .250

### EXTRA EXTENSION (EE)

- Single, reverse and double acting, add \$1.09 per inch of extension
- DXDE, add \$1.30 per inch of extension; extension added to each end

### DOUBLE ACTING FAILSAFE

- (JS = Spring Return, JR = Spring Extend)
- Add \$5.41 to base price + \$0.62 to stroke adder
- See page 1.65 and 1.66 for overall length adders

## OPTIONS continued...

### LOW TEMPERATURE (N)

Temperature Range: -40° to 200°F

- Single acting add \$0.83

- Models DXDE and DXDEH add .500

### EXTRA EXTENSION (EE)

- Single, reverse and double acting, add \$1.09 per inch of extension
- DXDE, add \$1.30 per inch of extension; extension added to each end
- DXDE hollow rod, add \$2.03 per inch of extension; extension added to each end

### DOUBLE ACTING FAILSAFE

- (JS = Spring Return, JR = Spring Extend)
- Add \$9.41 to base price + \$1.25 to stroke adder
- See page 1.65 and 1.66 for overall length adders

**HEAVY SPRINGS (H)** are standard on all single acting block front and block rear mount and -NRLSC models, and reverse acting except -RA type

- For all other single acting, add \$2.24
- Spring Force: 6 lbs. relaxed — 12 lbs. compressed

## OPTIONS continued...

### MAGNET (prefix M) — Add \$13.99

- Single acting and DXDE add .125" to overall length
- Use bumper length adder for DXDE and DXDEH when magnet and bumper are ordered together.
- Stainless steel rod becomes standard with this option
- Must specify track(s) for use with miniature position sensing (T2, T3, T4) — add \$3.48 per track. See page 1.9 for track location details. See Switch Products, page 9.3 for switch selection information.

### LOW TEMPERATURE (N)

Temperature Range: -40° to 200°F

- Single acting add \$1.14
- Reverse acting add \$1.56
- Double acting add \$2.24
- DXDE add \$2.96

### HIGH TEMPERATURE "U" CUPS (V)

Temperature Range: 0° to 400°F (-18° to 205°C)

- Single acting add \$6.45
- Double acting add \$15.24
- DXDE add \$19.29
- Reverse acting add \$9.98

### ROD WIPER (W)

(not available in standard single acting)  
(now available in block mount)

- Double acting add \$3.48
- DXDE add \$6.96

### STAINLESS STEEL ROD (prefix SR)

- Add \$2.50
- Standard on DX, DXDE, DXDEH, All block mountings and M option

### LOW PRESSURE HYDRAULIC (HL)

- 250 psi maximum
- Double acting models only
- Option specified as a prefix
- Add \$16.48

# 3" Bore Air Cylinders

- Ground and Polished, High Strength Carbon Steel Piston Rod Standard — 303 Stainless Steel Rod Available as an Option — Bronze Rod Guide Bushing Standard
- Force Exerted Approximately 7.0 of Air Line Pressure
- Double Acting Only
- Mounting Nuts Not Included

## OPTIONS:

### NO CHARGE:

- PORTS ROTATED (K)
- NO THREAD (NT)
- SIDE PORTED REAR HEAD (Q)  
Add .44" to nose mount overall length

### DOUBLE ACTING BUMPERS (B)

- \$9.88 additional
- Add .250 to overall length

### EXTRA EXTENSION (EE)

- Double acting, add \$2.18 per inch of extension
- DXDE, add \$3.22 per inch of extension; extension added to each end

☐ Enter Stroke Length as 3rd Digit

## OPTIONS continued...

### MAGNET (prefix M) — Add \$33.44

- Stainless steel rod becomes standard with this option
- Must specify track(s) for use with miniature position sensing (T2, T3, T4) — add \$3.48 per track. See page 1.9 for track location details. See Switch Products, page 9.3 for switch selection information.

### LOW TEMPERATURE (N)

Temperature Range: -40° to 200°F

- Double acting add \$4.26
- DXDE add \$5.67

### HIGH TEMPERATURE "U" CUPS (V)

Temperature Range: 0° to 400°F (-18° to 205°C)

- Double acting add \$22.62
- DXDE add \$29.95

### ROD WIPER (W)

(not available in standard single acting)

- Add \$6.76
- DXDE add \$13.52

### STAINLESS STEEL ROD (prefix SR)

- Add \$5.93
- Standard on DXP, DXDE, and M option

### LOW PRESSURE HYDRAULIC (HL)

- 250 psi maximum
- Double acting models only
- Option specified as a prefix
- Add \$26.99

# Three-Position Original Line Cylinders

Bimba's Three-Position Original Line stainless steel body cylinder provides three positions with a single cylinder. Bimba offers the performance and quality of the unitized Original Line cylinder design along with its product breadth now in three positive stroke positions.

## How to Order

The model number for all Three-Position Original Line cylinders consists of three alphanumeric clusters. These designate product type, bore size and stroke length, and options. Please refer to the charts below

for an example of model number M-043/4.5-DW. This is a 3/4" bore, with a 3" stroke for position A, plus an additional 4-1/2" stroke for position B, double acting cylinder with a rod wiper.

PRODUCT TYPE	BORE SIZE	STROKE A	STROKE B	STANDARD STROKE LENGTHS AND STROKE MAXIMUMS

**M - 043 / 4.5 - D W**

MOUNTING OPTIONS	OPTIONS
D – Double acting, nose mount DXP – Double acting, universal mount	(Enter in alphabetical order, except EE which is last) 99 – HT-99 oil pre-lube B – Bumpers K – Ports rotated 90° N – Low temperature seals and lubrication NT – Non-threaded rod Q – Side ported rear head (see standard Original Line information for applicable length adders by bore size) T – Switch Track (T2, T3 or T4) see Position Sensing Solutions, page 9.3 for switch selection information V – High temperature seals & lubrication W – Rod wiper EEX.XX – Extra rod extension

Note: Consult page 1.4 for option combination compatibility.

## Specifications

Description	Specification
Expected life	3,000 miles without additional lubrication when properly applied
Total stroke tolerance 9/16" - 1-1/2" 2"	+ .075/- .040 + .095/- .060
Operating medium	Air only
Maximum operating pressure	250 psi
Temperature range	-20°F to 200°F
Standard lubrication	Semi-synthetic grease
Endcaps, center section, and piston material	Aluminum
Cylinder body	304 stainless steel
Piston and rod seals	Buna N "U" cups
Rod and pivot bushings	Sintered bronze
Piston rod	303 stainless steel

# Air Cylinders with Adjustable Cushions

## Cushion Energy Absorption

Cylinders with air cushions provide a possible solution to destructive energies. The air cushion traps a small amount of exhaust air at the end of stroke, providing an air pocket that decelerates the load. This reduces the potentially destructive energy being transmitted to the cylinder and other components. The following is a brief explanation on how to determine the energy level of your application and decide if an air cushion can provide adequate energy absorption. For a more detailed description, consult the factory at 1-800-44-BIMBA.

Step 1. Determine the load to be stopped by the cylinder.

Step 2. Determine the velocity at which the load impacts the cylinder endcap.

Step 3. Calculate the energy the cylinder generates. Use the following equation:

$$\text{energy (e)} = \left(\frac{W}{64} \times v^2\right) + (p \times k)$$

w = weight of the load (lbs.)

V = velocity of the cylinder as the piston impacts the endcap (feet per second)

p = driving pressure (psi)

k = bore constant

Example: C-316-D at 80 psi with total load of 8 lbs.

driving pressure (p) = 80 psi

total load (w) = 8 lbs.

bore constant (k) = .24

maximum velocity (v) = 6 fps

$$= (8/64) \times (6^2) + (80 \times .24) = 23.7 \text{ ft. lbs.}$$

# MRS® Magnetic Reed Switch Air Cylinders

Specifically designed to operate Bimba position sensing switches to actuate programmable controllers, relays, solenoids, timers, or any other electrically operated equipment. MRS cylinders have an additional groove in the piston to accommodate a magnet. They differ from the M option because they combine features of the "Z" line with Original Line construction; check dimensional drawings for each size for more specific information. Type 303 stainless steel rods are standard.

## OPTIONS:

## Switch Track Options

For Original Line cylinders, including MRS cylinders, with -T2, T3, and T4 options

## Switch Track for use with Bimba MR, MS, MSC, and MSK Switches

Miniature Position Sensing track lengths can now be purchased separately for field mounting of custom track locations. Simply specify the length of track desired after the part number.

Mounting recommendations:

- Clean body with acetone. Remove all oil from body surface.
- Avoid mounting track over rolled construction. Locate edge of track 0.175" from rolled construction.
- Use a solid continuous bead of glue for the entire length of track used. Bead should fill center channel of track.
- Adhere to recommended cure times as specified by the glue manufacturer.

Bores	Part Number	List Price
007 - 04	D-74168-A-length	\$3.59
06 - 31	D-78527-A-length	3.59
50 - 70	D-78528-A-length	3.59

Loctite U-05FL or similar adhesive is recommended (not included).

# Non-Rotating Original Line Air Cylinders

Bimba's new Non-Rotating Original Line stainless steel body air cylinder design consists of a unique square piston rod with rounded corners. The square rod prevents rotation better than other rod configurations, and the rounded corners provide longer seal life than conventional hexagon rods. The unusual geometry of the square rod also provides superior rotation control. All bore sizes have a rotational control of less than or equal to  $\pm 3$  degrees. The special high strength aluminum alloy rod guide provides high load carrying capability and abrasion resistance. The urethane-based rod seal provides excellent seal life and leak-free service. The Non-Rotating Original Line cylinder is dimensionally interchangeable with the standard Original Line stainless steel cylinder.

## 9/16" Bore Non-Rotating Air Cylinders

- New! Stainless Steel Piston Rod Standard.
- Unique Square Piston Rod with Rounded Corners.
- High Strength Aluminum Alloy Rod Guide.
- Urethane-based Rod Seal.
- Buna N "U" Cup Piston Seal.
- Pressure Rating – 250 PSI Maximum (Air only)
- Available in Double Acting and Reverse Acting Models.
- Enclosed Spring Force: 2 lbs. Relaxed - 4 lbs. Compressed.
- Standard Buna N Seals Temperature Range of -20°F (-25°C) to 200°F (95°C)

# PC Cylinders

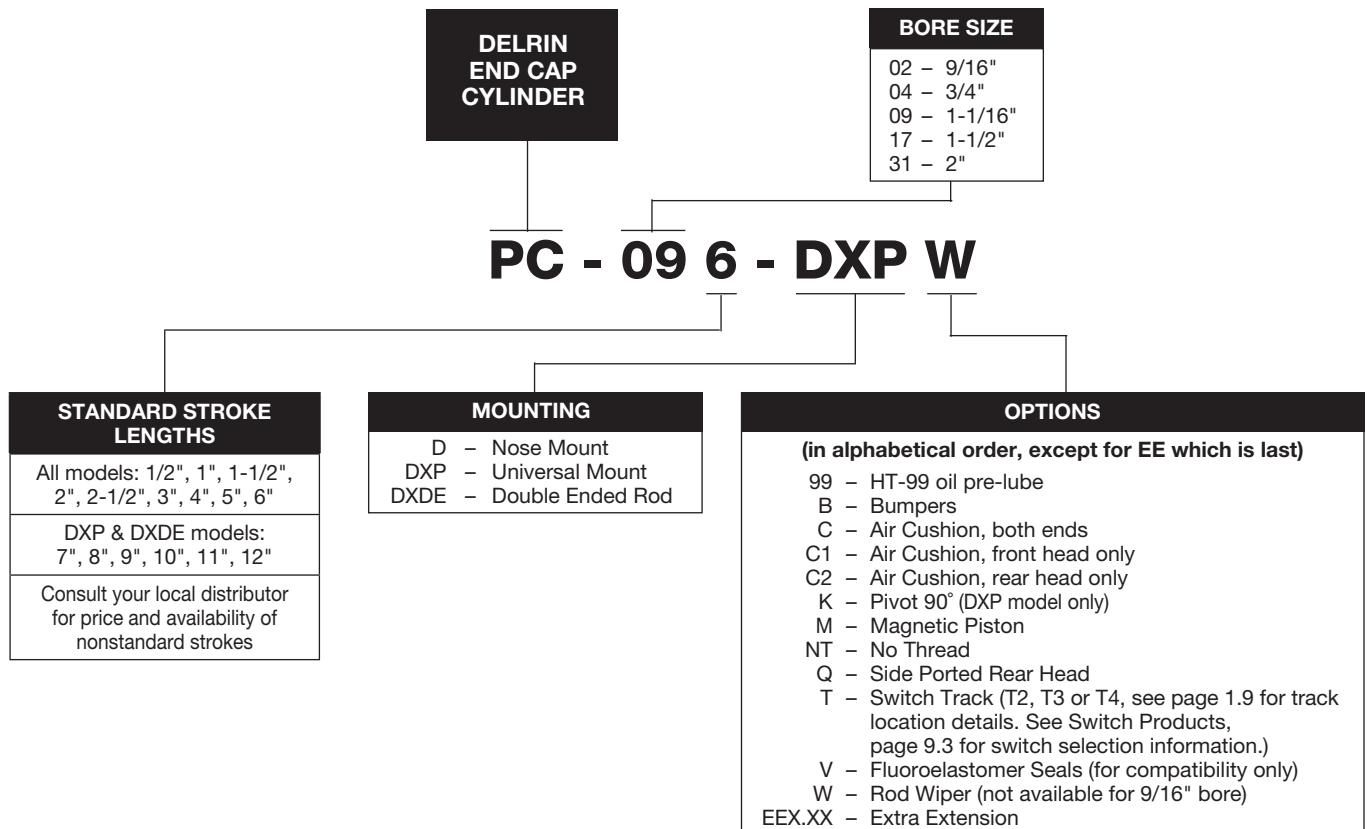

The Bimba PC Cylinder has a stainless steel body, stainless steel rod and acetal resin end caps. It is ideal for applications and environments that require exposure to moisture, lubricants and specific solvents.

## How to Order

The model number of all PC Cylinders consists of three alphanumeric clusters. These designate product type, bore size and stroke length, and options. Please refer

to the charts below for an example of model number **PC-096-DXPW**. This is an 1-1/16" bore, 6" stroke PC cylinder with a universal mount and rod wiper.

## Approximate Power Factors

9/16"	=	0.2
3/4"	=	0.4
1-1/16"	=	0.9
1-1/2"	=	1.7
2"	=	3.1

For example, a PC-096-DXPW will exert a force of 0.9 times the air line pressure; a PC-173-D will exert a force of 1.7 times the air pressure, etc.

## Component Description

1. Corrosion resistant 303 Stainless Steel end caps
2. 304 SS body with mirror finish ID for long, reliable seal life.
3. Urethane rod wiper designed to withstand exposure to harsh chemical solutions while limiting ingress of the solutions and application matter into the cylinder.
4. PTFE-based rod and pivot bushings selected for their resistance to many commonly used cleaning solutions.
5. Nitrile seals are standard with optional high temperature or other materials available.

## Operating Specifications

### Pressure Rating

250 psi air maximum

### Temperature Rating

-20°F to 200°F. Note that if the magnetic piston is used, maximum temperature is derated to 185°F. Fluoroelastomer seals rated for higher temperatures (up to 400°F) are available. Fluoroelastomer seals (option "V") should be ordered for chemical compatibility only. The temperature rating of the standard Urethane rod wiper is 200 degrees F. If a cylinder temperature rating of higher than 200 degrees F is required please contact your local distributor to request a quote for a custom design to meet your application requirements.

If cylinders are operated at temperatures below 0°F for extended time periods, our low temperature option (N) is recommended. This option has a temperature range of -40°F to 200°F. If cylinders are operated below -20°F with low temperature seals for extended time periods, cylinder performance will be affected by the cold temperature.

## How to Order

The model number of all Original Line Cylinders consists of three alphanumeric clusters. These designate product type, bores size and stroke length, and mounting styles and options.

Please refer to the charts below for an example of model number SS-092-DW. This is a 303 Stainless Steel End cap Cylinder, 1-1/16" bore, Double Acting Nose Mount, Rod Wiper (standard).

Model Type
SS - 303 Stainless Steel End caps
SSM - Includes Magnetic Piston

V - Fluoroelastomer Seals (for chemical compatibility) <sup>2</sup>
W - Rod Wiper (standard) <sup>3</sup>

\* Consult the option combination availability chart on page 1.4.

<sup>1</sup> HT-99 pre-lube is NOT a food grade lubricant.

<sup>2</sup> Specify for chemical compatibility only. For cylinders rated over 200°F, see the note under Operating Specifications on previous page.

<sup>3</sup> Rod Wiper is standard; "W" option must be included in part number.

# All Stainless Steel Repairable (Bell Ring Style) Original Line Cylinders

The all stainless repairable Original Line cylinders are ideal for food processing, chemical, medical, pharmaceutical, offshore or marine equipment, and energy production or waste management applications. The bell ring design also offers the added benefit of full repairability without the need for hand tools by securing the body to the rod guide with a knurled, threaded nut.
