

Custom and Standard Robotic End-of-Arm Tooling

PALLETIZING

Innovative and Reliable Palletizing Robotic End-of-Arm Tooling

As leaders in robotic gripping solutions, Piab and SAS Automation design EOATs with modular and custom-machined components that will operate on any style or make of robot. We also partner with most leading automation companies. We are ISO 9001:2015 Quality System Certified for quality assurance. EOAT components are proudly engineered and built in one of our world class production facilities.

+ INNOVATION

We are only as good as our ability to solve our customers' challenges. Piab is dedicated to more than supplying end-of-arm tools and components; we are dedicated to developing new solutions that drive our customers' success.

+ EXPERTISE

We can only consider ourselves experts if we are first humble learners and explorers. We listen to our customers. We focus on learning more about our craft. We practice and test until we get it right. We set high standards for ourselves.

+ PRECISION

Our components and tools work because we pay attention to details. Successful automation requires precision to accommodate the size and weight of the products being moved. We must also be able to handle the right speed, plus a variety of materials and shapes. Successful automation is a complex business that requires a dedication to precise execution.

BENEFITS

- Reduced down-time and increased productivity thanks to our modular system
- Increased productivity through collaborative innovative thinking that solves your EOAT challenges
- Decrease your cost through our innovative in-house engineering, manufacturing, and testing
- Minimize administration cost through online purchasing at our e-commerce site
- Increase your uptime as we offer next day delivery on components
- Increase your productivity as we can provide world-wide on-site sales, installation, training, and service

BAG GRIPPING

Our family of robust bag grippers are ideal for palletizing plastic, woven cloth, or paper bags containing grains, chemicals, dog food, minerals, and many other products. We offer reliable and adjustable Hybrid Bag Grippers (HBG) and our durable Fixed Bag Grippers (FBG).

- Designed for 25 and 50kg payloads
- HBG eliminates custom tooling and with adjusts in less than 30 seconds
- FBG adjusts in less than 4 minutes
- Secure solid stainless-steel gripper fingers
- Decking plates align for precision placement
- Optional slip sheet and pallet hooks are also available

Hybrid Bag Grippers

Hybrid Bag Grippers

Hybrid Bag Grippers with Vacuum Depalletizer
Ideal for palletizing plastic, grain bags, chemicals, and other bagged products

FORK-STYLE

Retracting Fork-style EOATs are particularly well suited for open-top containers and over-sized bags that must be picked from the bottom. The stroking forks are designed to pick product from a roller conveyor. The forks retract through a stationary stripper plate and the product is placed on the pallet.

- Durable secure solid stainless-steel construction
- Engineered to provide fast and reliable performance
- Optional slip sheet is also available
- Forks can also be used to pick and place a shipping pallet

Fork Tools

Fork Grippers
Ideal for open-top containers and oversized bags that must be picked from the bottom

CARTON CLAMPING

Side clamp EOATs work particularly well for slip top cartons as well as heavyweight applications where a topside pick is not possible; such as 18.14 kg (40 lb.) blocks of cheese in glued-up corrugated cartons. The clamping cylinders are programmable for force applied to the carton. This also allows for multiple sizes of cartons to be palletized with the same EOAT.

- Suited for high demand environments
- Adjustable and customizable to multiple applications
- Engineered to provide fast and reliable performance
- Optional slip sheet system is also available

Carton Clamp

Combination Bag / Carton Gripper

Carton Clamping

VACUUM PLATE

We provide Vacuum Plate End-of-Arm Tools to palletize single containers and even complete pallet layers. These EOATs are powered to provide superior gripping capabilities by using high-vacuum flow. We design and build vacuum plate EOATs for cartons, pails, and bag applications.

- Powered by vacuum turbines or venturi generators
- Plates can also be zoned for multiple pick and place
- Valved vacuum ports automatically close when there are gaps
- Designed for heavy and high vacuum flow applications

Area Wide Vacuum Grippers

Area Wide Vacuum Grippers

As one of the world's largest suppliers of end-of-arm tooling (EOAT) and gripper systems for palletizing, you can trust our ability to provide you the components, installation training, technical service and troubleshooting your business needs to keep operations on schedule.

Call our sales team at 888-SAS-EOAT (727-3628) to request a quote.

Any part. Any robot. Anywhere.

QUALITY PRODUCTS & SERVICE

We meet or exceed customer expectations by providing superior Robotic End-of-Arm Tooling and Automation Technology. Together with our customers and suppliers, we continuously improve our products and services to assure market leadership.

TECHNICAL SERVICE

Call our toll-free line to speak with a skilled technician or engineer for any troubleshooting or installation questions. Application advice and assistance is also available via phone or email. We also provide an online forum on our website.

ON-SITE INSTALLATION AND CRISIS RECOVERY

Our skilled technicians can re-stock your spare parts, train your personnel, or solve automation problems on your production floor.

AUTOMATION TRAINING CENTER

Learn how to build tools at training sessions offered at our headquarters in any of our facilities. You may select a standard tool building session or a custom tooling session specific to your application.

SPARE PARTS NEXT DAY

The Piab shopping cart makes getting replacement parts that much easier. Most parts ship from inventory next day. Our modular components are manufactured in-house at our locations. Therefore, custom machined parts are also available with quick turnaround!

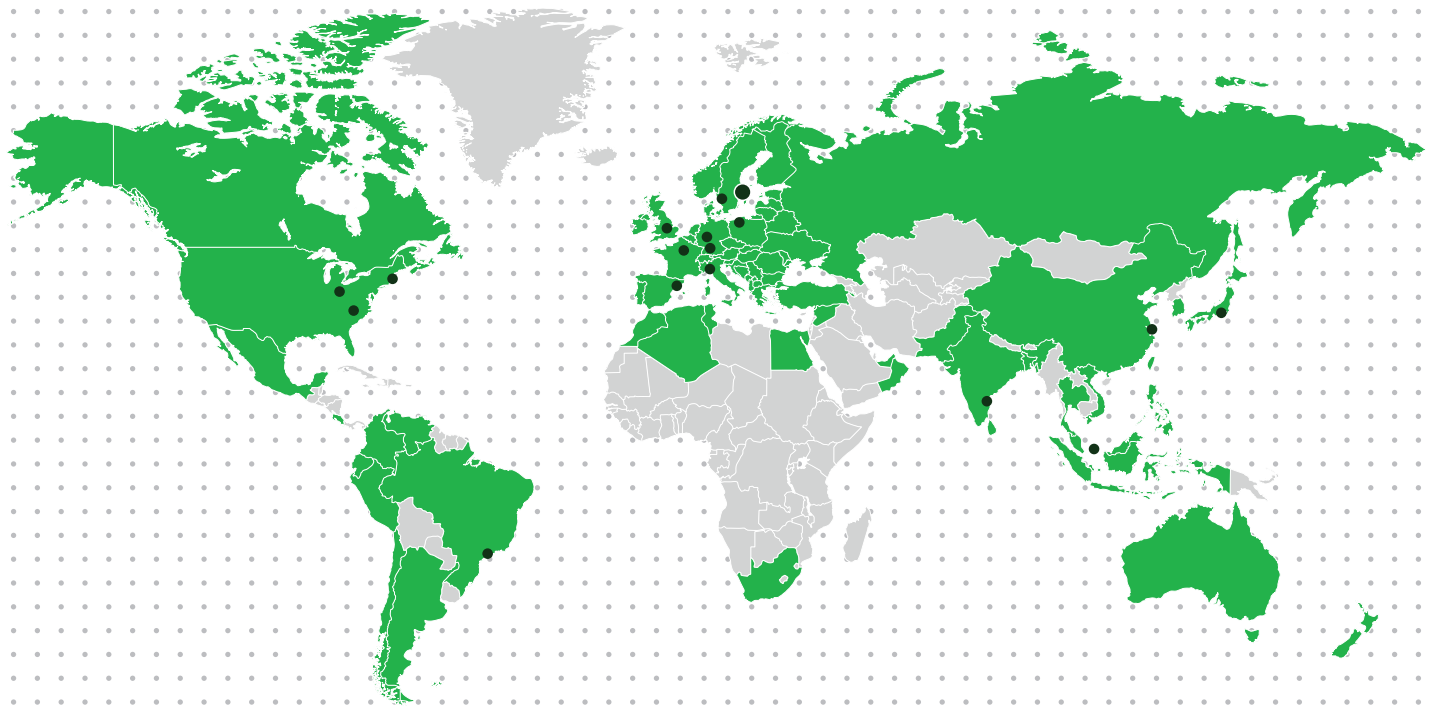

EOAT CERTIFICATION

Piab now offers training at our US headquarters near Dayton, Ohio with an added benefit: EOAT Certification. We recommend that certification training take place at our corporate facility, so you can take advantage of our training environment and the variety of robots, automation equipment, and tools available.

MODULAR COMPONENTS

Piab offers a complete line of modular components to allow you to rapidly build tools in your own plant, meeting rapidly changing automation needs on-demand.
