AGW-250 Parallel Gripper
Wide-Body, Synchronous/Non-Synchronous

FEATURES AND BENEFITS
• Ultra high gripping force to weight ratio due to four opposing independent pistons that direct power to the jaws.
• True parallel jaw motion for easy tooling.
• Units are permanently lubricated for non-lube air operation, allowing for compliance with OSHA regulations.
• Large jaw support shafts are guided through the full width of the main body.
• Proximity switches are available to monitor open and closed position of the jaws.
• The AGW Series is fully field repairable for cost savings and minimum down time.
• Non-synchronous versions allow the gripper’s jaws to comply to the part’s centerline versus the gripper’s centerline.
