7350 SERIES CONVEYORS

Stainless Steel Conveyors for Dry, Wipe Down
and Wet Applications

DORNER[®] 

Sleek, Low Profile Design - 7200 & 7300 Series*

- Quick, five-minute belt change for increased uptime
- Rack and pinion for fast, single point belt tensioning
- V-Groove frame with V-Guided belt ensures accurate tracking
- Streamlined design fits where other conveyors do not
- Low profile, single piece frame for quick, easy cleaning
- Quick-clamp rail for easy mounting of bolt-on accessories

Rugged and Durable Design - 7350 Series

- 304 Stainless Steel frame features open design with minimal horizontal surfaces
- Designed for wipe down and low pressure wash-down with non-caustic chemicals
- V-guided belt tracking on belted models
- Tip-up tails for access inside the conveyor for cleaning and maintenance
- Safest chain in the industry with chain openings less than 4 mm even on curves
- Unique chain design virtually eliminates friction providing capacity for up to 4 curves on a single conveyor

Tip-Up Tails

Innovative Chain Design

Positive Drive Belt

Engineered Solutions

- Dorner's Engineered Solutions Group can tailor fit AquaGard Conveyors for specific applications and product handling requirements
- With a custom-designed conveyor system in place and the help of highly specialized engineering, your products are processed faster, your services are delivered quicker, and your profits are increased
- Solutions include: chicaning, retracting tails, depositing and rejects, merging, product flow, and more!

The Benefits of Dorner AquaGard Conveyors

Industry Ready

- Designed and manufactured to food equipment standards
- BISSC certified conveyors
- FDA approved materials and components
- Washdown rated gearmotors and controls

A Focus on Speed

- Dorner sets the industry standard for rapid delivery
- Sanitary conveyors ship in as little as 10 business days
- Fast and effective design reduces cleaning preparation time

*Please refer to the AquaGard 7200 & 7300 Series manual for product information.

Specifications

- Loads up to 227 kg (500 lbs) or 98 kg/sq m (20 lbs/sq ft)*
- Belt speeds up to 91 m/min (300 ft/min)
- Belt widths: 152 mm (6 in) to 914 mm (36 in)
- Conveyor lengths: 915 mm (36 in) to 12190 mm (480 in)
- One revolution of drive pulley moves the belt approximately 280 mm (11 in)
- Bolt-together 304 Stainless Steel Frame
- Hard chrome coated bearing with FDA H1 food grade grease
- FDA approved belting and plastic components
- Open design with minimal horizontal surfaces
- Suitable for use in wet environments
- Stainless Steel construction for wipe down and low pressure washdown with non-caustic solutions
- V-guide belt tracking

STANDARD FEATURE: V-Guided Belt Tracking

*Note: Do not run the conveyor with the tail in the tip-up position.

Specifications

- Loads up to 227 kg (500 lbs) or 98 kg/sq m (20 lbs/sq ft)*
- Belt speeds up to 71 m/min (233 ft/min)
- Belt widths: 152 mm (6 in) to 914 mm (36 in)
- Conveyor lengths: 915 mm (36 in) to 2500 mm (984 in)
- Positive driven belt provides greater load capacity and less slip
- Bolt-together 304 Stainless Steel Frame
- Hard chrome coated bearing with FDA H1 food grade grease
- USDA smooth top positive drive belt (Available in blue or white)
- Open design with minimal horizontal surfaces
- Suitable for use in wet environments
- Stainless Steel construction for wipe down and low pressure washdown with non-caustic solutions

STANDARD FEATURE:
Positively driven drive sprockets
and belt to avoid belt slipping

STANDARD FEATURE:
Integrated UHMW Return Shoe
provides positive belt control
and sprocket engagement

FLAT BELT PROFILES

CLEATED BELT PROFILES

W = Conveyor Belt Width **Dim** = mm (in)

Due to the wide variety of drive set ups and applications, point of installation guarding is the responsibility of the end user.

Standard Belt Selection Guide

Standard belt material is stocked at Dorner, then cut & spliced at the factory for fast conveyor shipment.

Belt Type - Finger Splice	Belt Type - Plastic Clipper	Belt Type - Metal Clipper	Belt Specifications	V-Guidable	Belt Thickness	Surface Material	Maximum Part Temp. °C (°F)	Coefficient of Friction	FDA Approved	Anti-Static	Static Conductive	Chemical Resistance	Special Characteristics or Applications
01	A1	1A	FDA Accumulation	x	1.7 (0.067)	Urethane	100 (212)	Low	x	x		Good	Packaging, clean room and inspection
02	A2	2A	General Purpose	x	1.8 (0.071)	Urethane	100 (212)	Med	x	x		Good	Most versatile belt offering
03	A3	3A	FDA High Friction	x	1.7 (0.067)	Urethane	100 (212)	High	x	x		Good	Packaging, clean room and inspection
05	A5	5A	Accumulation	x	1.2 (0.047)	Urethane	100 (212)	V-Low	x	x		Good	Accumulation of products
06	A6	6A	Electrically Conductive	x	1.6 (0.063)	Urethane	80 (176)	V-Low		x	x	Good	Electronics handling
08	A8	8A	High Friction	x	2.1 (0.083)	PVC	70 (158)	V-High		x		Poor	Conveys up to 35° inclines*
09			FDA High Friction	x	1.5 (0.059)	Urethane	100 (212)	High	x			Good	Lower no load torque

Dim = mm (in)

Note: See below for splice details. Plastic Clipper splice requires longer lead times. Clipper splice not available on Z-Frame Series Conveyors.

Note: Belts with V-Guiding may have a slight high spot or rib on the top surface. This rib would run longitudinally along the center of the belt.

Consult factory with applications for which this may cause interference.

*Incline varies due to factors like dust, fluids and part material.

Note: Wet applications are limited to specialty belt types 54, 55, 69 and 70 only (see next page).

BELT SPLICING

Finger Splice

All belts are available with a standard Thermoformed finger splice. This splice makes the belt continuous and is virtually undetectable. Splice bonding methods vary by belt type. Consult factory for details.

Plastic Clipper**

An optional plastic clipper splice is available for quick removal of belts or when conveyors are installed in tight spaces.

Metal Clipper**

An optional metal clipper splice is also available for quick removal of belts or when conveyors are installed in tight spaces.

**** Plastic and Metal Clippers are slightly thicker than base belt. Contact factory for details.**

Solid Urethane belt for added sanitary protection –
See belt type 70 below

High Release Cover belt for handling sticky food such as raw dough –
See belt type 71 below

Note: Wet applications are limited to specialty belt types 54, 55, 69 and 70 only.

Specialty Belt Selection Guide

Specialty belt material is not stocked at Dorner and needs to be custom ordered for your special conveyor needs.

Specifications

- Loads up to 341 kg (750 lbs) or 98 kg/sq m (20 lbs/sq ft)*
- Belt speeds up to 78.6 m/min (260 ft/min)
- Belt widths: 203 mm (8 in) to 914 mm (36 in)
- Conveyor lengths: 915 mm (36 in) to 25000 mm (984 in)
- Bolt-together 304 Stainless Steel Frame
- Hard chrome coated bearing with FDA H1 food grade grease
- FDA approved belting and plastic components
- Open design with minimal horizontal surfaces
- Suitable for use in wet environments
- Stainless Steel construction for wipe down and low pressure washdown with non-caustic solutions

OPTIONAL: Nose Bar Idler Tail

25 mm (1 in) diameter for small parts transfer. Speeds up to 79 m/min (260 ft/min)

OPTIONAL: Nosebar Drive Tail

25 mm (1 in) diameter for small parts transfer. Speeds up to 79 m/min (260 ft/min)

Specifications

- Loads up to 227 kg (500 lbs) or 98 kg/sq m (20 lbs/sq ft)*
- Belt speeds up to 78.6 m/min (260 ft/min)
- Belt widths: 152 mm (6 in) to 610 mm (24 in)
- Conveyor section lengths: 460 mm (18 in) to 15240 mm (600 in)
- Curve angles of 45, 90, 135 and 180 degrees
- Bolt-together Stainless Steel Frame
- Mold to width chain up to 457 mm (18 in) wide
- No chain opening exceeding 4 mm (0.15 in)
- FDA approved belting and plastic components
- Chain supported with stainless steel center bearing, increasing load capacity and the ability to have up to 4 curves on a single motor
- Optional powered transfer for smooth transfer of parts as short as 75 mm (3 in) in diameter
- Suitable for use in wet environments
- Stainless Steel construction for wipe down and low pressure washdown with non-caustic solutions

Curve Innovation

Integrated chain bearing and guide rail eliminates friction

OPTIONAL: Powered Transfer

For small parts and maintaining speeds through transfer. Slave driven with speeds up to 78.6 m/min (260 ft/min). Transfer parts as short as 75 mm (3 in) long.

STANDARD FEATURE: Flush Top, Low Side Frame

Multiple Curve Configurations

* Conveyor load capacity depends on conveyor size, incline, motor position, accumulated loads and other factors.

Order gearmotor mounting packages and gearmotors separately, see pages 44-48.
For support stands and accessories, see page 50-55.

Conveyor Type: T = Modular Belt Curve

Powered Transfer

- 13 mm (5 in) diameter roller for small part transfers
- Maintains speed through the transfer
- 8 mm micropitch chain slave driven off of tail module
- Conveyor widths 152 mm (6 in) to 914 mm (36 in)
- Belt speeds up to 53 m/min (175 f/min)
- Available as an option on Modular Belt Curve
- Can be located on drive and/or idler tail

Specifications

- Loads up to 45 kg (100 lbs) or 98 kg/sq m (20 lbs/sq ft)*
- Belt speeds up to 78.6 m/min (260 ft/min)
- Belt widths: 203 mm (8 in) to 610 mm (24 in)
- Conveyor section lengths: 610 mm (24 in) to 6100 mm (240 in)
- Maximum total conveyor length of 12190 mm (480 in)
- Angles from 5 degrees to 30 degrees in 5 degree increments
- Bolt-together Stainless Steel Frame
- FDA approved belting and plastic components
- Suitable for use in wet environments
- Stainless Steel construction for wipe down and low pressure washdown with non-caustic solutions

MODULAR BELT PROFILES

W = Conveyor Belt Width **Dim** = mm (in)

Due to the wide variety of drive set ups and applications, point of installation guarding is the responsibility of the end user.

CLEATED MODULAR BELT PROFILES

W = Conveyor Belt Width **Dim** = mm (in)

Due to the wide variety of drive set ups and applications, point of installation guarding is the responsibility of the end user.

MODULAR BELT TYPES

Flat Top Belts

provide a closed surface for complete product support, easy wiping.

Flush Grid Belts

provide an open surface for better drainage, cleaning or air flow/cooling.

Friction Inserts

are available for incline applications. Inserts may be placed along entire length of the belt or spaced on 51 mm (2 in), 102 mm (4 in), 152 mm (6 in) or 305 mm (12 in) centers. Friction inserts are indented 51 mm (2 in) from each belt edge.

Curve Belts

provide a tight radius, space saving corner. Side tabs ensure positive belt tracking with a flush top design. Stainless bearings reduce friction providing capability of up to (4) corners.

Cleated Belts

provide a sturdy cleat for elevation at steep inclines. Cleats available in 25 mm (1 in) and 76 mm (3 in) heights.

* FDA = Food and Drug Administration, CFIA = Canadian Food Inspection Agency

** Temperature, environmental conditions, product materials and product configuration effect the maximum incline or decline. Product testing is recommended.

*** These do not indicate ambient running conditions. Ambient temperature range is -1 to 38 C (30 to 100 F).

Product temperature is dependent on length of time product is in direct contact with belt surface. Product testing is recommended.

GEARMOTOR MOUNTING PACKAGE & GEARMOTOR SELECTION STEPS

- Step 1:** Select a **Gearmotor Mounting Package** (below).
- Step 2:** Use the **Belt Speed Chart** (page 46) to determine your desired belt speed based on conveyor type and mount package. See Gearmotor column.
- Step 3:** Locate the appropriate gearmotor chart (pages 47-48) in terms of **Painted** vs. **Stainless Steel** based on your gearmotor chart numbers

Bottom Mount Package, 90° Gearmotor

- Includes stainless steel gearmotor mounting bracket, timing belt, plated pulleys, guard and mounting hardware
- Conveyor belt speed can be adjusted with optional ratio pulley kits

W = Conveyor Belt Width

Side Mount Package, 90° Gearmotor

- Includes stainless steel gearmotor bracket, coupling and mounting hardware

W = Conveyor Belt Width

90° Gearmotor Location Options

Due to the wide variety of drive set ups and applications, point of installation guarding is the responsibility of the end user.

Note: Conveyor and gearmotor are not included in the mounting package and must be ordered separately. Dimensions = in (mm)

Nose Bar Mount Package, 90° Gearmotor

- Includes stainless steel gearmotor mounting bracket and mounting hardware

W = Conveyor Belt Width

FLA = Full Load Amperes

Fixed Height Stands

- Welded open frame Stainless Steel construction with a 2B finish
- Adjustable angle connecting plate from 0° to 60 degrees
- For 152 mm (6 in) to 914 mm (36 in) Widths:
- ± 51 mm (2 in) of adjustment
- Optional swivel locking caster
- Optional diagonal brace for added stability
- For available heights see page 52

Support Stand with optional outrigger and diagonal brace shown

STANDARD FEATURE:
Fixed Foot

OPTIONAL:
Swivel Caster

OPTIONAL: Diagonal Brace

Outriggers

- Fixed height support stands are available with outriggers
- Outriggers provide added support for tall applications
- Welded Stainless Steel construction with 2B finish
- Extend stand width 316 mm (12.43 in)

Dimensions = mm (in)

Note: Due to the wide variety of conveyor and stand options along with possible configurations, stability of the final setup is the responsibility of the end user.

Tall Supports Stands

- Welded tubular Stainless Steel construction brushed to #4 finish
- ± 50 mm (2 in) of adjustment
- Adjustable angle connecting plate from 0° to 60°
- Includes diagonal brace for stability
- Tall Support Stands require the use of floor anchors
- For available heights see page 52

STANDARD FEATURE:
Fixed Foot

Tall Stand

Low Height Supports Stands

- All components are Stainless Steel brushed to #4 finish
- ± 51 mm (2 in) of adjustment
- Fixed Foot self-aligns 10° for sloped floors
- Caster is swivel locking
- Horizontal conveyor mounts only
- For available heights see page 52

**Swivel Locking
Caster Model**

Fixed Foot Model

Dimensions = mm (in)

Horizontal Ceiling Supports

Specifications

- All components are Stainless Steel brushed to #4 finish
- Includes a pair of mounting brackets and hardware for support on both sides of conveyor
- Compatible with 12 mm (0.5 in) threaded support rod (not provided)

Part Number	73HCS
-------------	-------

Adjustable Angle Ceiling Supports

Specifications

- All components are Stainless Steel brushed to #4 finish
- Includes a pair of mounting brackets and hardware for support on both sides of conveyor
- Compatible with 12 mm (0.5 in) threaded support rod (not provided)
- Mounting block pivots to support incline mounts from 0° to 60°

Part Number	73ACS
-------------	-------

Sanitary Floor Anchor Kits - Type 1

Specifications

- 10 mm (.375 in) x 40 mm (1.57 in) drop in
- Stainless Steel
- Anchor is flush with floor upon removal of bolt
- Two (2) per anchor kit

Part Number	FAS-1
-------------	-------

Sanitary Floor Anchor Kits - Type 2

Specifications

- 10 mm (.375 in) x 70 mm (2.75 in)
- Stainless Steel
- Threaded anchor bolt protrudes above floor after installation
- Two (2) per anchor kit

Part Number	FAS-2
-------------	-------

Dimensions = mm (in)

Note: Due to the wide variety of conveyor and stand options along with possible configurations, stability of the final setup is the responsibility of the end user.

Accessory Mounting Bar

Specifications

- Used for mounting adjustable devices such as photoeyes and sensors
- Can be mounted directly to frame or in combination with guide brackets
- Includes 1248 mm (48 in) long bar with (3) mounting brackets
(Bar can be cut to length as needed)
- Compatible with Value Guide blocks (VG-021-02)
- All brackets and fasteners are Stainless Steel

Part Number	517509	Bar Assembly 1248 mm (48 in) long
-------------	--------	-----------------------------------

Photo Eye and Reflector Mounting Brackets

Specifications

- Mounts standard 18 mm (0.71 in) barrel or nose mount photo eyes or sensors
- Attach bracket or accessories without frame modifications
- Adjustable along the length of the conveyor
- Adjustable height and angle positioning
- All adjustment screws located outside the food zone
- (3) Photo Eye Types
 - Thru beam includes (2) mounts
 - Reflector includes (1) photo eye mount and (1) reflector mount (reflector included)
- Accessory Mounting Bar Style: (3) Mount versions:
 - To fixed post (does not include mounting post)
 - To fixed post (includes mounting post)
 - To accessory mounting bar (includes Value Guide Block and adjustable post)

7350 Series: Photo Eye Bracket - Accessory Mounting Bar Style

7352	P	M	-	F	P
	Mount Type:			Post Type:	
	PM = Photoeye Mount			NP = Fixed Post w/o post included	
				FP = Fixed Post w/ post included	
				AM = Accessory Mount	
				RM = Reflective Mount	
				CM = Convergent Mount	

Dimensions = mm (in)

Note: Due to the wide variety of conveyor and stand options along with possible configurations, stability of the final setup is the responsibility of the end user.

Roller Transfer Plate

Specifications

- 150 mm (6 in) wide to 914 mm (36 in) wide
- Includes 1 mm (0.43 in) diameter rollers mounted in transfer plate
- Adjustable mounting to fine tune small parts transfer
- All brackets and fasteners are Stainless Steel

7350 Series: Roller Transfer Plate

7352T - X - W W
 - Conveyor Width: 152 - 914 mm (6 - 36 in)
 - Belt Type: B = Belted C = Modular Belt Curve
 M = Modular Belt Straight P = Positive Drive

Overhead Guide

Specifications

- For part hold down or cover closing
- Adjustable height and position across width
- Round nose UHMW guide with stainless steel backing
- Lengths: 914 mm (36 in) to 3048 mm (1200 in) in 25 mm (1 in) increments
- Horizontal Brackets provided for every 609 mm (24 in) of length
- Available in standard adjustable and tool-less adjustable mount styles
- All brackets and fasteners are Stainless Steel
- Does not include vertical mounting post. To be used with profiles 13 thru 18 or upper guide assembly

7350 Series: Overhead Guide

7352HG A - L L
 - Guide Length: 914 - 3048 mm (36 - 120 in)
 - Guide Type: A = Adjustable T = Tool-less

Drip Pans

Specifications

- Widths: 152 mm (6 in) to 1524 mm (60 in) available in 50 mm (2 in) increments
- Lengths: 610 mm (24 in) to 25375 mm (999 in) available in 25 mm (1 in) increments maximum section lengths of 2997 mm (118 in)
- Tool-less hook design for fast removal and rapid cleaning
- Provides a 50 mm (2 in) window for clean-out access without removal
- All pans equipped with a 25 mm (1 in) containment lip on all sides
- Contact factory for additional options and ordering

Dimensions = mm (in)

Note: Due to the wide variety of conveyor and stand options along with possible configurations, stability of the final setup is the responsibility of the end user.

Regulatory Approvals:

Conveyors:

All Dorner 7350 Series standard conveyors (not including gearmotors and controllers) are CE approved. CE approval follows the provisions of the following directives; Machine Directive 2006/42/EC, EU Low Voltage Directive 2006/95/EC, and EMC Directive 2004/108/EC. All conveyors are marked with the CE symbol on the Dorner serial number tag located on the conveyor frame. Contact the factory for the CE Declaration of Conformity.

All Dorner 7350 Series standard conveyors (not including gearmotors and controllers) are designed and manufactured in accordance with the restrictions defined in the "Restriction of Hazardous Substances" directive, citation 2002/95/EC, commonly known as RoHS. All conveyors are marked with the RoHS symbols on the Dorner serial number tag located on the conveyor frame.

Gearmotors and Controllers:

All Dorner 7350 Series gearmotors and controllers carry one or more of the following approvals. Products are not covered by each approval. Please see the appropriate part number on the Gearmotor and controller charts located in this manual. In addition, regulatory symbols are located on the product information tags located on the product.

	<p>CE Marking on a product is a manufacturer's declaration that the product complies with the essential requirements of the relevant European health, safety and environmental protection legislation, in practice by the Product Directives. CE Marking on a product ensures the free movement of the product within the European Union (EU).</p>
	<p>This directive restricts (with exceptions) the use of six hazardous materials in the manufacture of various types of electronic and electrical equipment. It is closely linked with the Waste Electrical and Electronic Equipment Directive (WEEE) 2002/96/EC which sets collection, recycling and recovery targets for electrical goods and is part of a legislative initiative to solve the problem of huge amounts of toxic e-waste.</p>
	<p>The UL Recognized Component mark is for products intended to be installed in another device, system or end product. This Recognized Component Mark is for the United States only. When a complete product or system containing UL Recognized Components is evaluated, the end-product evaluation process can be streamlined.</p>
	<p>The UL Recognized Component mark is for products intended to be installed in another device, system or end product. This Recognized Component Mark is for the United States and Canada. When a complete product or system containing UL Recognized Components is evaluated, the end-product evaluation process can be streamlined.</p>
	<p>CSA International (Canadian Standards Association), is a provider of product testing and certification services for electrical, mechanical, plumbing, gas and a variety of other products. Recognized in the U.S., Canada and around the world, CSA certification marks indicate that a product, process or service has been tested to a Canadian or U.S. standard and it meets the requirements of an applicable CSA standard or another recognized document used as a basis for certification.</p>
	<p>The UL Listing Mark means UL found that representative product samples met UL's safety requirements. These requirements are primarily based on UL's own published standards for safety. The C-UL-US Mark indicates compliance with both Canadian and U.S. requirements. The products with this type of Mark have been evaluated to Canadian safety requirements and U.S. safety requirements.</p>

Baking Industry Standards and Certifications:

AquaGard 7350 Series Conveyors are often used in food production or food packaging areas where proper design of equipment is essential to maintain proper food safety. AquaGard 7350 Series conveyors are designed for light wash down environments typically seen in packaged food, dry food production or confectionary production. In these applications the correct installation and application of the conveyor is critical to the proper running of the conveyor and maintaining proper food safety. The end user must ensure that the conveyor belts are properly tracked and the conveyor is properly installed as defined by Dorner.

All AquaGard 7350 Series products are designed and constructed to be used in dry food or packaged food production environments. The following AquaGard products have gone through testing and certification and are certified to BISSC standard, design requirements for Conveyors section of ANSI/ASB/Z50.2-2015.

7350 Series Belted Conveyor
7350 Series Modular Belt Conveyor
7350 Series Positive Drive Belted Conveyor

Contact the factory for copy of the certification.

Materials and Chemical Resistance:

Conveyor Frames, Plastics and Modular Belting	
The following is a list of base materials used in the 7350 Series conveyor:	
Material	Conveyor Component
Acetal Copolymer, POM	Modular Belts, molded bearing housings
Polypropylene, PP	Modular Belts
Polyamide, PA	Adjustable Guide Support Brackets
UHMW-PE	Modular Belt Slide Rail, Adjustable Guide Face
Thermoplastic Elastomer, TPE	Modular Belt Friction Insert
Aluminum, anodized (Note: cut ends of aluminum is not anodized)	Conveyor Frame, Support Legs, High Side Guiding, Adjustable Guide Horizontal Post, Adjustable Guide Rail

The materials used in the 7350 Series product can resist many chemicals, however some should be avoided. Avoid the following:

- Acids with PH less than 4
- Bases with PH higher than 9

Resistance to Materials: Conveyor Frames, Plastics and Modular Belting					
<p>The following table provides the resistance to materials used in the conveyor to several chemicals. Application testing is recommended to determine long term material durability.</p> <p>Legend:</p> <p>1 = Very good resistance 2 = Good resistance 3 = Moderate resistance 4 = Not recommended X = no data available</p>

Bearings and Lubrication:

All bearings on AquaGard 7350 Series Conveyors are sealed and lubricated for life. No grease zerk is available and no greasing over the life of the product is required.

All gearmotors used on AquaGard 7350 Series conveyor are sealed and may be mounted in any position. Changing gear oil lubrication may be needed over the life of the gearbox. Please check the appropriate gearmotor manual for instructions.

Support Stand Locations:

Support Stand Locations			
Symbol	Description	Distance	
		mm	in
A	Maximum distance back at drive end	610	24
B	Maximum distance back at idler end	762	30
C	Maximum distance between supports	2997	118

Note: Dimensions = mm (in)

Conveyor Drive Shaft Tolerances:

End Drive, Belted and Modular Belt:

Center Drive:

Conveyor Noise Level (Decibel Ratings)

The actual noise level generated by the conveyor depends on several factors; the installation configuration, the product running on the conveyor, the surrounding equipment, the conveyor options and belt speed. The noise level generated by the conveyor is typically less than the general noise level of factory equipment.

Generally a higher belt speed will result in a higher noise level. In addition modular belt conveyors will run slightly louder than belted conveyors. The following charts provide basic decibel ratings for a typical conveyor arrangements.

Belted Conveyors:

Modular Belt Conveyors:

Maximum Load Capacity

The following Load Capacity Charts **do not** take into account the conveyor configuration, length or gearmotor selection. Your specific conveyor may not be capable of the maximum load condition. Please confirm your maximum load per application with the Dorner DTools program at www.dornerconveyors.com.

All load capacities shown are non-accumulated evenly distributed loads.

No Load Torque:

No load torque is the amount of torque required to turn an empty conveyor. The torque value varies by conveyor length and configuration. The following charts provide basic values for an average length conveyor. Your specific conveyor may not be have a higher value. Please confirm your no load torque and maximum load per application with the Dorner DTools program at www.dornerconveyors.com.

Belted Conveyor No Load Torque		
Belt Width mm (in)	Belted End Drive Nm (in-lbs)	Belted Center Drive Nm (in-lbs)
152 (6)	0.9 (8)	7.9 (70)
203 (8)	1.1 (10)	8.6 (76)
254 (10)	1.5 (13)	9.2 (81)
305 (12)	1.7 (15)	9.9 (88)
356 (14)	2.3 (20)	10.2 (90)
406 (16)	2.3 (20)	10.2 (90)
457 (18)	2.8 (25)	10.5 (93)
508 (20)	3.1 (27)	10.9 (96)
559 (22)	3.1 (27)	11.2 (99)
610 (24)	3.4 (30)	11.9 (105)
660 (26)	3.7 (33)	12.5 (111)
711 (28)	3.7 (33)	12.5 (111)
762 (30)	4 (35)	13.2 (117)
813 (32)	4.3 (38)	13.8 (122)
864 (34)	4.3 (38)	13.8 (122)
914 (36)	4.3 (38)	14.8 (131)

Straight Modular Belt Conveyor:

The no load torque on modular belt straight conveyors is dependent on the conveyor length and width. Use the following formula to determine no load torque. Where:

L = conveyor length (mm)

W = conveyor width (mm)

BW = belt weight (kg) = $(W/1000) * ((L^2)/1000) * 8.7$ kg/square meter

PD = sprocket pitch diameter (mm) = 99 mm

$$\text{No load Torque (Nm)} = BW * (0.3) * ((PD/2)/1000)$$

Example: 7350 V2 Series Straight Modular Belt, 610 mm wide x 7000 mm long

Belt weight (kg) = $(610/1000) * ((7000^2)/1000) * 8.7 = 74.3$ kg

No load torque (Nm) = $74.3 * 0.3 * ((99/2)/1000) = 1.1$ Nm

No load torque (in-lb) = $(Nm) * 8.851 = 1.1 * 8.851 = 9.77$ in-lb

Curve Modular Belt Conveyor:

The torque calculations for curve conveyors are complicated and are very dependent on the conveyor save and configuration. Please confirm your no load torque and maximum load per application with the Dorner DTools program at www.dornerconveyors.com.

Belting and Coefficient of Friction

The coefficient of friction is used to determine the load a conveyor can carry. It effects a conveyor in two ways: the friction that exists between the conveyor belt and the bed surface, and if accumulating product, the friction that exists between the conveyor top surface and the product.

Coefficient of Friction, between the bottom of the conveyor belt and bed surface:

Product	Surfaces	Application Condition	Coefficient of Friction
7350 Series Belted	Impregnated polyester fabric to anodized aluminum bed plate	Dry	0.33
7350 Series Modular Belt	Acetal modular belt to UHMW wear strips	Dry	0.30

Coefficient of Friction, between the top surface of conveyor belt and product:

7350 Series Belt

The following table provides the coefficient of friction between steel product and various belt top surfaces. All factors below are assuming dry conditions.

Belt Number	Top Surface Material and Type	Coefficient of Friction
01, 54, 58, 68, 73, 81	Smooth hard urethane	0.40
02, 59, 60, 61, 66, 72, 76, 79	Smooth medium urethane	0.50
03, 19, 55, 69, 75, 77, 78, 80	Glossy soft urethane	>1.0, do not accumulate
05, 06, 50, 53, 63	Impregnated polyester fabric	0.20
08, 18, 64	PVC, Very High friction	>1.0, do not accumulate

7350 Series Modular Belt

The following table provides the coefficient of friction between acetal modular belt and various products. All factors below are assuming dry conditions.

Product Being Accumulated	Typical Coefficient of Friction
Steel	0.25
Glass	0.20
Aluminum	0.25
Plastic	0.25
Wood	0.30
Paper and Cardboard	0.30

Calculating Conveyor Load Capacity

There are several factor that effect the overall conveyor load of AquaGard 7350 Series Conveyor. These include:

- Conveyor size and configuration
- Conveyor speed
- Application temperature
- Product accumulation
- Number of starts and stops per hour

Located online at www.dornerconveyors.com is the Dorner conveyor configuration tool, DTools. This tool allows you to configure your conveyor layout and determine the maximum load capacity for the conveyor. It is suggested that this program be used to calculate the conveyor load as the calculation is quite complicated. This configuration program however does not take into account temperature, dirty conditions, and conveyor starts and stops. If these conditions are part of your application please use the load reducing factors as shown below.

Maximum Load = (Load from DTools)(Temperature Factor)(Start/Stop Factor)

Temperature Factor

Ambient temperature can negatively affect the capacity of the conveyor.

Temperature F	Temperature C	Temperature Factor
-4	-20	1.0
32	0	1.0
68	20	1.0
104	40	0.9
140	60	0.8

Start / Stop Factor

Frequent Start / Stops of the conveyor can negatively affect the capacity of the conveyor. All start / stop applications must use a soft start mechanism such as a Frequency Inverter with a 1 second acceleration cycle.

Application Condition	Start / Stop Factor
Continuous Run or 1 start/stop per hour	1.0
Maximum 10 starts/stop per hour	0.83
Maximum 30 starts/stop per hour	0.70
Greater than 30 starts/stop per hour	0.62

Calculating Conveyor Belt Speed:

AquaGard 7350 Series Conveyors:

To calculate the conveyor belt speed you need to know the following factors:

DR = Drive roller diameter or drive sprocket pitch diameter (mm)

= 89 mm (3.5 in) for end and center drive belted conveyors

= 99 mm (3.9 in) for end drive modular belt conveyors

= 99 mm (3.9 in) for end positive drive belt conveyors

TD = Number of teeth of pulley located at drive roller (if equipped)

TG = Number of teeth of pulley located at gearmotor (if equipped)

RPM = Revolutions per minute of gearmotor

$$\text{Belt Speed (m/min)} = \text{RPM} \times (\text{TD}/\text{TG}) \times (\text{DR}/1000) \times 3.14$$

Example:

AquaGard 7350 Series Belted End Drive, bottom mount with a 36 tooth pulley located at the drive roller and a 30 tooth pulley located on the gearmotor. The gearmotor is a 10:1 ratio with 173 rpm output.

$$\text{Belt Speed (m/min)} = (173) \times (36/30) \times (89/1000) \times 3.14$$

$$\text{Belt speed (m/min)} = 58 \text{ m/min}$$

$$\text{Belt speed (ft/min)} = 58 \text{ m/min} \times (3.28) = 190 \text{ ft/min}$$

$$\text{No load torque (Nm)} = 74.3 \times 0.3 \times ((99/2)/1000) = 1.1 \text{ Nm}$$

$$\text{No load torque (in-lb)} = (\text{Nm}) \times 8.851 = 1.1 \times 8.851 = 9.77 \text{ in-lb}$$

Dorner AquaGard Conveyors are Best for:

- Baking
- Packaged Foods
- Pet Foods
- Secondary Packaging
- Snack Foods
- Tight Transfers
- Confectionary
- Elevation Changes
- And More!

7200 & 7300 Series Specifications*

- Belted and Cleated Belt Models
- Loads up to 27 kg (60 lbs)
- Widths: 44 mm (1.75 in) to 457 mm (18 in)
- Lengths: 610 mm (2 ft) to 8486 mm (18 ft)
- 11 gauge Stainless Steel roll formed frame
- 7300 features a high pressure bearing option
- Available in straights only

7200 Rated for Wipe Down and Wet Environments

7300 Rated for Wash Down with Chlorinated Cleaners

7350 Series Specifications

- Belted, Cleated Belt, Modular Belt, Modular Cleated Belt Models and Positive Drive Options
