Guard Locking Switch Stainless Steel Type: KL3-SS-P2L

FEATURES:

Solenoid Locking Interlock Safety Switch featuring POWER TO LOCK with Guard Holding to 3000N (300Kg) (F1Max)

The KL3-SS-P2L Series Guard Locking switches have a slim stainless steel 316 body design and have been developed with a holding force of 3000N to keep large guard doors closed until hazards have been removed.

They are Power to Lock - Spring to Unlock - suitable for applications where immediate unlocking is required at removal or loss of power. (They are NOT suitable for machines with a running down time).

The Stainless Steel 316 housing provides a durable robust hold closed. Flexible actuators are available to aid where some alignment

IP69K enclosure protection is maintained by a double seal lid gasket design and metal fixings.

They have a slim profile and are designed to fit on 50mm (2") frame sections or to applications where space is restricted.

The head will rotate to provide up to 8 actuator entry positions.

FUNCTIONAL SPECIFICATIONS:

Positive Break Contacts to EN60947-5-1 High Functional Safety to ISO13849-1 Stainless Steel 316 Housing and fittings Connects to most Safety Relays to give up to PLe Cat.4 Quick Connector version available for ease of installation Machine safety contacts open when power is released LED Status of Solenoid Power

2NC Safety Circuits:

21/22	Open		Solenoid Energised	
33/34	Open		Tongue Inserted	
43/44		Oper	Tongue Inserted]

For all IDEM switches the normally closed (NC) circuits are closed when the guard is closed actuator inserted.

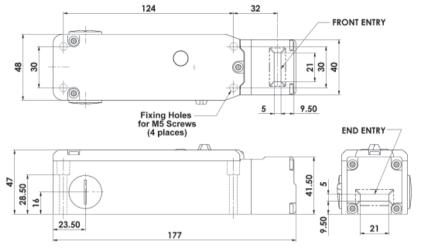

Guard Locking Switch Stainless Steel Type: KL3-SS-P2L

DIMENSIONS:

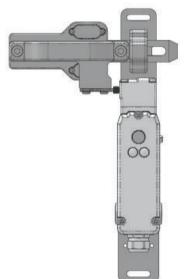

RELATED PRODUCTS & ACCESSORIES (see p100-101 and Gate Bolts Section 6)

GATE BOLT LOCK

Rugged metal construction, easy to install on sliding or hinged guards.

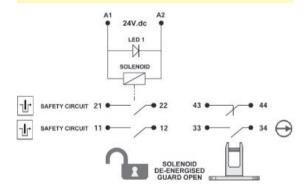

Holes for fitting padlocks during maintenance.

Fits to switch aperture during maintenance and provides multiple padlock holes.
